## Special MRC - CIRs for ELCC Resources Page Turn for Package I

CBIR Matrix with Solution Packages: Solution Packages

## Summary Table for Package I Redlines

Design Component	Governing Document Sections	PJM Manual Sections
CIR Request Policy	-	Manual 21 Section 1.1.1 Attaining CIRs Clarify CIR request policy for Unlimited Resources  Manual 21A Section 4.1 Attaining CIRs (new section) CIR request policy for ELCC Resources
CIR Verification, Testing, and Retention Policy	-	Manual 21A Section 4.2 Retaining CIRs (new section) CIR retention rules for ELCC Resources  Section 7 Testing (new section) Describes the verification / testing requirements for ELCC Resources
CIRs in ELCC Methodology and AUCAP Calculations	Reliability Assurance Agreement (RAA)  Definitions  Update to reflect capping of Effective Nameplate Capacity (ENC) at CIRs for Limited Duration Resources  Schedule 9.1 Section F Calculation of Accredited UCAP and ELCC Resource Performance Adjustment Updates to reflect historical curtailment adjustments and capping of output in determining the performance adjustment  Schedule 9.1 Section H Details of the Effective Load Carrying Capability Methodology	Manual 20 Section 5.3 Resource Performance Updates to historical curtailment adjustments and capping of output in the ELCC analysis.  Manual 21A Section 1.2 General Approach to Calculation of Accredited UCAP Update to ENC definition consistent with RAA Section 3.2 Calculation of ELCC Resource Performance Adj. Changes in calculation of Performance Adjustment for Variable/Hybrid resources Section 5.3 Parameters for Limited Duration Resources (which Includes
	Updates to reflect historical curtailment adjustments and capping of output in the ELCC analysis.	Section 5.3 Parameters for Limited Duration Resources (which Includes Energy Storage Resources)  Update to reflect CIR cap on ENC for Limited Duration Resources

	Schedule 9.1 Section I Methodology to Simulate Output of Certain Resources in the Effective Load Carrying Capability Model Updates to reflect capping of output in analysis for Combination Resources.	Section 5.4 Parameters for Combination Resources Other than Hydropower with Non-Pumped Storage Updates to the contribution of the underlying components to the ENC of a Combination Resource (Other than Hydropower with Non-Pumped Storage)  Section 5.5 Parameters for Hydropower w/ Non-Pumped Storage Update to reflect CIR cap on ENC  Section 8 BackCast Update to reflect capping of the backcasted hourly output
Transition Mechanism	Tariff Part VII, Subpart J, section 400 Transitional System Capability Study Rules on the Transition System Capability Study and application of the transitional capability to eligible resources.	Manual 14B Attachment J (new section) Business rules further detailing the transitional system capability study and application of transitional capability to eligible resources.
