

## Must-Offer Exception Process: MIC Proposal

Patrick Bruno Sr. Engineer, Capacity Market Operations Markets & Reliability Committee December 6, 2018

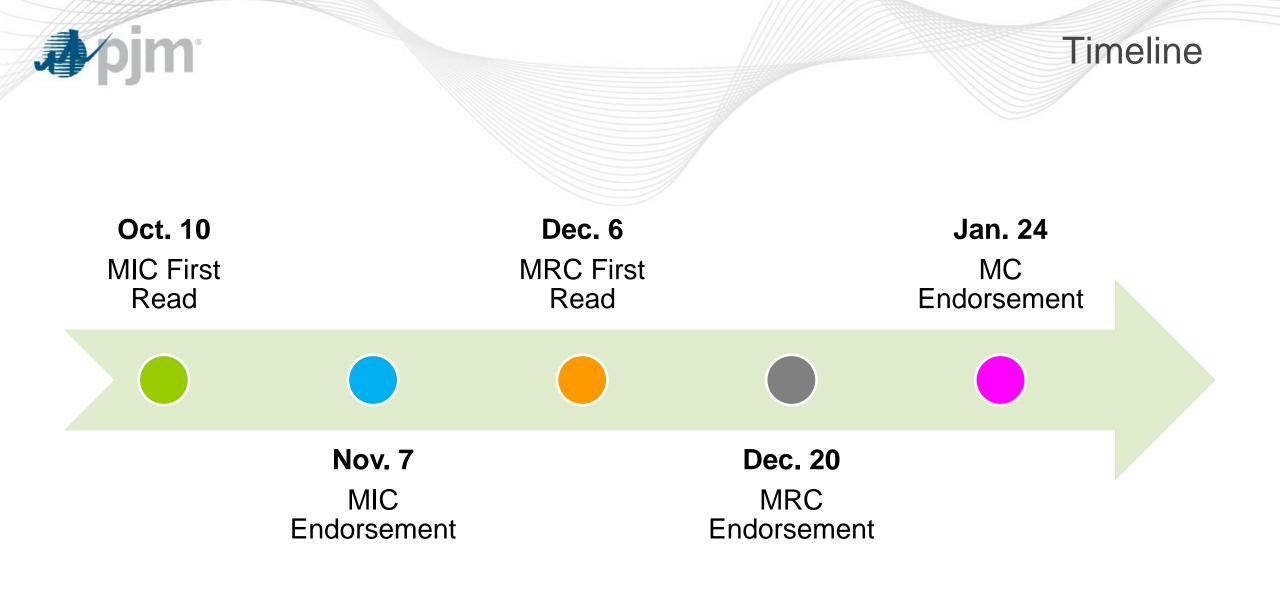

**MIC Issue Background** 

- This Issue was brought forward by Exelon to investigate:
  - Possible reforms to the RPM Must-Offer Exception Process for improved efficiency and clarity
  - Process for Existing Generation Capacity Resources with a must-offer requirement to become energy only resources
- Approved at March MIC and assigned to MIC
- Two packages voted at November MIC
  - Single proposal endorsed with 79% in favor

#### **Must-Offer Background**

- RPM Must-Offer Requirement
  - Participants are required to offer their available MW on Existing Generation Capacity Resources in all RPM auctions
    - Intermittent and Storage are categorically exempt from offering as CP
- Must-Offer Exception Process
  - Prior to an RPM auction, participants may submit a request to PJM and the IMM to forego this requirement for one of the defined reasons specified in the Tariff
    - General Must-Offer Exceptions (e.g. delayed in-service, deactivation, etc.)
    - Capacity Performance (CP) Must-Offer Exceptions
  - The IMM and PJM review the request and supporting data/documentation to make a determination on approval
  - The request and review process must be done in a timely manner consistent with the deadlines specified in the Tariff

## Proposal

#### **Must-Offer Exception Process**

#### **Process Efficiency**

- 1. Allow participants to specify multiple auctions in their written Must-Offer Exception requests submitted to PJM and the IMM
  - For system tracking, a MIRA request is still needed for each auction, but no need to re-submit all the same supporting data/documentation for each subsequent auction
  - PJM and the IMM will still review with each subsequent auction

#### **Process Clarifications**

- 2. Must-Offer Exception requests are <u>not</u> required for generators approved for an "early replacement" transaction
  - Current rules already prohibit the replaced generator from re-committing those MW for the Delivery Year; no need to also submit a Must-Offer Exception Request
- 3. Timing is an acceptable reason for a CP Must-Offer Exception
  - A resource that cannot have its project completed in time by the start of the Delivery Year that's needed to be CP capable is an acceptable reason for a CP Must-Offer Exception

#### Capacity Resource Status Change

- Participants may initiate the process to remove a Generation Capacity Resource from its Capacity Resource status by submitting a written request to PJM and the IMM, along with supporting data and documentation
  - Requests and PJM/IMM review of a Capacity Resource status change will follow the same deadlines of Must-Offer Exceptions related to deactivation for RPM auctions
  - Preliminary and final MWs of units requesting a status change will be included in the posting of Must-Offer Exceptions related to deactivations
- Requests are not permitted for a Delivery Year in which the Generation Capacity Resource holds a capacity commitment

- PJM will run any necessary reliability studies for relinquishment of Capacity Interconnection Rights (CIRs) by the resource
  - e.g. Generator / Load Deliverability Tests
- The IMM will review for uncompetitive behavior and market power
- Upon approval, the generation unit will no longer be modeled as a Capacity Resource effective with the date of the status change
  - No longer eligible to offer in auctions or take on commitments for the relevant future DYs
- The CIRs of the resource will be relinquished in a manner consistent with a deactivating unit
  - One year from the effective date of status change if not re-used in queue (Tariff Section 230.3.3)

- A status change to energy only will be required for Existing Generation Capacity Resources that are repeatedly approved for CP Must-Offer Exceptions and not offered in BRAs for 3 consecutive Delivery Years
  - Status change required at start of fourth Delivery Year
- If circumstances change prior to the effective date of the status change that now allow the unit to qualify as a Capacity Performance Resource:
  - No later than 135 days prior to the status change, participants may submit a written request to PJM and the IMM requesting that the unit retain its Capacity Resource status
  - Requests must provide supporting data and documentation showing verifiable evidence that the resource can meet the performance requirements of a Capacity Performance Resource by the start of the relevant Delivery Year
  - If PJM grants such request and the Generation Capacity Resource is offered in the next applicable RPM auction, the unit shall no longer have its Capacity Resource status removed

#### **Tariff and Manual 18 Revisions**

- Tariff, Attachment DD
  - Section 6.6 Offer Requirement for Capacity Resources
  - Section 6.6A Offer Requirement for Capacity Performance Resources
  - Section 230.3.3 Replacement of Generation
- Manual 18: PJM Capacity Market
  - Section 5.2 RPM Auction Timeline
  - Section 5.4.1 Resource-Specific Sell Offer Requirements
  - Section 5.4.7 Removal of Generation Capacity Resource Status
  - Section 8.9 Replacement Resources

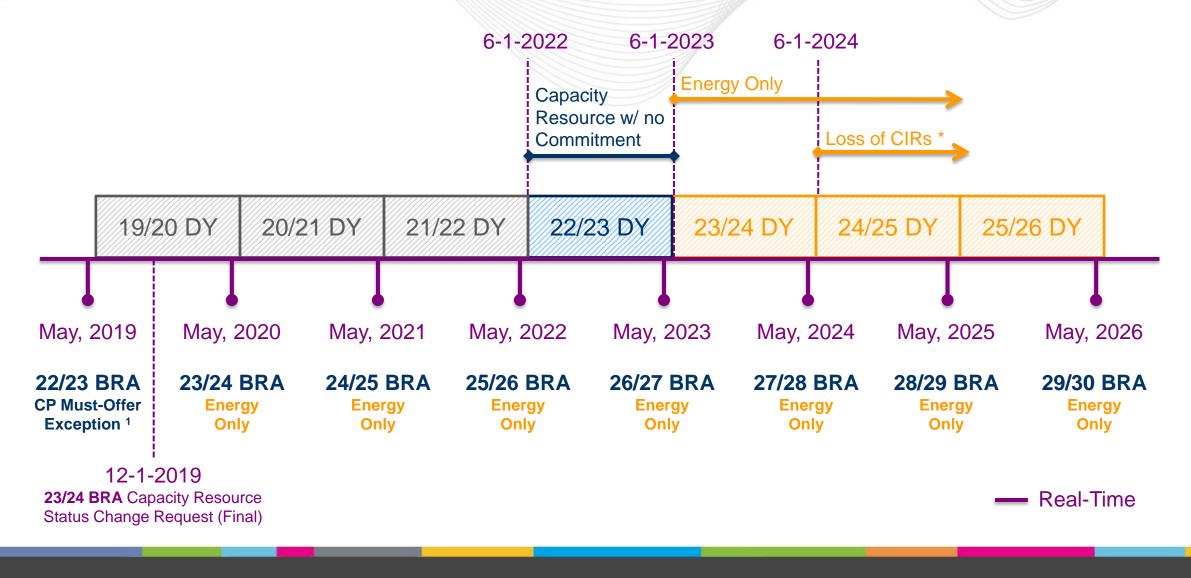

## Appendix

#### Capacity Resource Status Change: Deadlines

| Activity  | Deadline                                  |
|---|---|
| Preliminary request for Capacity Resource status change   | SEPT01 prior to BRA, 240 days prior to IA |
| Final request for Capacity Resource status change   | DEC01 prior to BRA, 120 Days prior to IA  |
| IMM provides determination on status change request   | 90 days prior to auction                  |
| Capacity Market Sellers notify PJM/IMM of agreement with IMM determination on status change request | 80 days prior to auction                  |
| PJM provides determination on status change request   | 65 days prior to auction                  |

### Example: Capacity Resource Status Change Request for 23/24 BRA

- Real-Time

**Must-Offer Exceptions** 

- Currently, two Must-Offer Exception sections one that is general and one that is specific to Capacity Performance
- General Must-Offer Exceptions in Tariff, Att. DD, sec. 6.6(g):
  - is reasonably expected to be physically unable to participate in the relevant Delivery Year;
  - has a financially and physically firm commitment to an external sale of its capacity, or
  - was interconnected an Energy Resource and not subsequently converted to a Capacity Resource.

#### **General Must-Offer Exceptions**

- What does "physically unable to participate" mean?
  - Documented plan to retire during or prior to the DY and has submitted its Deactivation notice to PJM
  - Significant physical operational restrictions cause long term or permanent changes to the installed capacity value of the resource, or the resource is under major repair that will extend into the applicable DY
  - Involved in an ongoing regulatory proceeding specific to the resource (e.g., environmental) and has received an order...or other final directive that will result in the retirement of the resource
  - It is only considered "Existing" because it cleared an RPM Auction, but will not be inservice by the start of the applicable DY

#### **CP Resource Must-Offer Exceptions**

- Under Tariff, Attachment DD, section 6.6A
  - reasonably expected to be physically incapable of satisfying the requirements of a CP Resource
    - The review process and timeline is the same as under 6.6(g)
      - 120 days prior to auction for reasons other than deactivation
  - Intermittent and storage are categorically exempt

#### Physically Incapable of being a CP Resource

- "Physically incapable" includes...
  - Necessary capital improvements, or new fuel delivery infrastructure, that cannot be arranged, permitted, and completed in time for the relevant Delivery Year
- "Physically incapable" does *not* include...
  - Seller's refusal to make investments, or allocate the operating budget, needed to bring the resource's performance up to the necessary level
  - Economic feasibility tests

- Obligated to deliver energy during the relevant Delivery Year as scheduled and/or dispatched by PJM during Performance Assessment Intervals
  - PJM Tariff does *not* prescribe specific fuel arrangements or investment requirements needed to meet CP performance obligations
- Subject to CP Parameter Limited Schedule (PLS) rules

#### Must-Offer Exception Request Deadlines

| Activity   | Deadline                                  |  |  |  |  |
|--|---|--|--|--|--|
| Preliminary must-offer exception for reason of deactivation  | SEPT01 prior to BRA, 240 days prior to IA |  |  |  |  |
| Final must-offer exception for reason of deactivation  | DEC01 prior to BRA, 120 Days prior to IA  |  |  |  |  |
| Must-offer exception for other than deactivation   | 120 days prior to auction                 |  |  |  |  |
| IMM provides determination on must offer exception   | 90 days prior to auction                  |  |  |  |  |
| Capacity Market Sellers notify PJM/IMM of agreement with IMM determination on must offer exception | 80 days prior to auction                  |  |  |  |  |
| PJM provides determination on must offer exception   | 65 days prior to auction                  |  |  |  |  |
| Capacity Market Seller notifies PJM/IMM of intent to exercise approved exception                   | 65 days prior to auction                  |  |  |  |  |
