

Demand Response Subcommittee Final Proposal Report

August 6, 2014

Issue Summary

[DR Annual Maintenance Outage Reporting Process](#)

[Problem Statement](#)

[Issue Charge](#)

Problem Statement brought forward by PJM

Problem Statement/Issue Charge approved at January 8, 2014, MIC

Number of Meetings covering this topic: 9

1. Recommended Proposal

Consensus was reached on the process of requesting a maintenance outage between October and April for DR registrations with an Annual Product. The maintenance can be for a device or generator that cannot be reasonably scheduled outside of the availability window or if a CSP's dispatch system is undergoing maintenance. The duration of an outage is between one and thirty days, outage requests must be at least four business days in advance and outage cancellations may be made by the CSP prior to the start of the maintenance or by PJM one day prior to the start of the maintenance if system conditions warrant. An outage for the CSP dispatch system maintenance may only be performed on a weekend and may only last one day. If PJM has an emergency event and CSP has approved outages then CSP capacity commitment used to measure compliance will be reduced based on registration's share of capacity commitment for linked DR resource

Appendix I: Proposals Not Meeting the Threshold

None
