

## PJM Regional Transmission and Energy Scheduling Practices

### 1.18 ~~RESERVED~~ ~~Transmission Loading Relief Buy-Through Capacity Type~~

~~The TLR Buy-Through product enables non-PJM Interchange Schedules the ability to pay through congestion during a PJM-declared Transmission Loading Relief (TLR) event. In order to request a TLR Buy-Through path on the PJM OASIS, the Market Participant must first provide PJM Member Relations an abbreviated Transmission Service agreement. This abbreviated Transmission Service agreement is only needed for those entities that are not already PJM Transmission Customers. For more information on the necessary forms required, please contact the PJM Member Relations at (610) 666-8980 or [custsvc@pjm.com](mailto:custsvc@pjm.com).~~

~~The following procedures outline how Market Participants may utilize the TLR Buy-Through capacity type offered on the PJM OASIS:~~

- ~~1. Prior to requesting a TLR Buy-Through path on the PJM OASIS, the Market Participant should set up its Interchange Schedule with the external Balancing Authorities as normal.~~
- ~~2. Once the Interchange Schedule is set up, the Market Participant can choose to purchase a TLR Buy-Through path for the capacity of the off-system transaction on the PJM OASIS.~~
- ~~3. The Market Participant will choose a path and product on the PJM OASIS, as directed by PJM.~~
- ~~4. The Market Participant may only choose default Source and Sink values. The actual source and sink where the congestion charge will be applied will be dependent on system topology at the time a PJM TLR is called for excessive circulation.~~
- ~~5. The capacity of the external reservation should be entered in the capacity requested field of the TLR Buy-Through reservation.~~
- ~~6. The Tag ID of the off-system transaction must be entered in the request's CUSTOMER\_COMMENTS data element.~~
- ~~7. On submittal, the PJM OASIS automation will accept any request made by a valid Transmission Customer.~~
- ~~8. The Market Participant must then contact the OASIS administrator at [oasisadmin@pjm.com](mailto:oasisadmin@pjm.com) to provide them with the Tag ID and the energy profile of the off-system transaction, and to inform them of the TLR Buy-Through request submission. The TLR Buy-Through path is a daily product only, and must be reserved and coordinated with PJM, by 12:00 noon EPT, the day prior to the energy flow.~~
