Throughout the Year	Updates will be posted periodically throughout the year.

**Recommendations status updates and details are posted on pjm.com and noted in applicable stakeholder agendas.*

Recommendation Work Area Documentation Overview

Work Area

The 30 PJM WSE report recommendations were consolidated into “work areas” to aid with understanding the general space the recommendation will have an impact upon and for tracking detailed updates at the related stakeholder meetings.

Work Area	Summary of Improvements	STATUS
Resource Performance	Enhance the generator cold weather checklist and cold weather operating limit reporting.	Complete
<p>ACTIONS:</p> <ul style="list-style-type: none"> • Cold weather preparedness checklist updated with additional NERC and industry best practices reflected in PJM Manual 14D: Generator Operational Requirements. • Expanded cold weather preparations presentations for stakeholders to include more resources on training, using PJM's online tools and cold weather emergency procedures. • Participated with ReliabilityFirst in visits to generators to assess winter readiness status, plans and best practices. • Analyzed cold weather data requests. 		
<p>FERC, NERC and Regional Entity Staff Winter Storm Elliott Report Mapping:</p> <p>Generator Cold Weather Reliability – Recommendations: 1b, 1c, 1d 1g</p>		

Status

Complete indicates the deliverables noted in the Report and Recommendations were met.

Additional work may still be ongoing in this space beyond the WSE recommendations.

FERC and NERC Report Mapping

The mapping to Work Areas is based on the FERC, NERC and Regional Entity Staff Report's grouping of the recommendations into four categories, The report recommendation groups are:

- Generator Cold Weather Reliability (Recommendations: 1a, 1b, 1c, 1d, 1e, 1f, 1g, 2 & 3)
- Natural Gas Infrastructure Cold Weather Reliability (Recommendations: 4, 4a, 4b & 4c)
- Natural Gas-Electric Coordination for Cold Weather Reliability (Recommendations: 5, 6 & 7)
- Electric Grid Operations Cold Weather Reliability (Recommendations: 8, 9, 10 & 11)
