

# Cleveland LDA Implementation

PJM Planning Committee  
10/11/2012

- **Current Efforts**
  - Determine which actual load/customers are physically served by the aggregate load buses in the planning reliability model used to establish the Cleveland LDA
- **PJM Initial Observations**
  - 100% of the proposed Cleveland LDA is within the existing ASTI LDA
  - Initially, it appears that 100% of the Illuminating Company is within the Cleveland LDA
  - There are a few customers in Ohio Edison that also belong in the Cleveland LDA (on the western edge of the LDA) and PJM is working to identify them

**Legend**

- Trans Lines < 345 kV
- Trans Lines >= 345 kV
- Proposed Cleveland-Lake Erie LDA
- Subs < 345 kV
- Subs >= 345 kV
- Cleveland Electric Illuminating
