

# Emerging Technologies Survey

Natalie Tacka  
Applied Innovation Department

Planning Committee  
April 6, 2021

- Initial survey issued October 2020
  - 11 individual responses; 74 affiliate companies (results in appendix)
- Data is being used to focus PJM emerging technology efforts and provide a roadmap for the Emerging Technologies Forum.
  - *A greater quantity and diversity of input from the membership is being sought to supplement existing responses*
  - *Additional topic for feedback: Big data analytics and machine learning*

- *If you already filled out this survey, we are only asking that you provide a response to the additional questions.*
  - Revising or supplementing initial responses would also be appropriate, but is not necessary. PJM will reconcile survey data from the previous version.

**Request: Please sign up for the Emerging Technologies Forum email distribution to receive the survey**
