

TEAC: AEP Informational Update

March 7, 2023

New Albany Area

- AEP is experiencing significant load growth in the New Albany area.
- As a result of the land development in this region, new easements and rights-of-way are becoming increasingly difficult and costly to obtain.
- In anticipation of this continual and future growth, AEP is planning to acquire ROW options/easements for two corridors in this area to facilitate any required future infrastructure development.
