

# Generation Deactivation Notification Update

Transmission Expansion Advisory Committee  
Oct 31st, 2023

# Deactivation Status

| Unit(s)           | MW  | Transmission Zone | Requested Deactivation Date | PJM Reliability Status                                   |
|-------------------|-----|-------------------|-----------------------------|--|
| Trent BT1         | 4   | AEP               | 01/01/2024                  | Reliability analysis completed.<br>No impact identified. |
| Warrior Run Gen 1 | 180 | APS               | 06/01/2024                  | Reliability analysis in progress.                        |
| H.A Wagner        | 844 | BGE               | 06/01/2025                  | Reliability analysis in progress.                        |

\* PJM does not approve deactivations, but rather identifies whether the requested deactivation date could lead to reliability concerns on the system. When PJM determines a proposed deactivation would adversely affect the reliability of the Transmission System due to upgrade completion timeline and absent operational measures, PJM desires and requests the Generation Owner extend operations of the deactivating unit(s). The Generation Owner may elect to support system reliability by operating until necessary network upgrades are completed by either filing its proposed Cost of Service Recovery Rate (CSRR) at FERC or accepting the Deactivation Avoidable Cost Credit (DACC) provided in the Tariff. PJM will announce at subsequent TEAC(s) after the Generation Owner submits a CSRR to the FERC and after the FERC accepts the CSRR filing or after the Generation Owner agrees to the DACC.

- PJM’s preliminary assessment indicates reliability violations with Wagner’s requested deactivation. The assessment assumed Brandon Shores continues to be in operation.
- PJM will continue its analysis to determine impact and communicate findings in subsequent TEAC meetings.
