Issue Summary

Investigate process and rule changes necessary to allow Day-ahead and Realtime market offers for physical resources to vary hour by hour. On June 9, 2015, FERC issued two orders related to gas balancing losses incurred by Duke and ODEC in January 2014, rejecting both requests for relief. In the Duke Order, FERC established a separate section 206 proceeding in Docket No. EL15-73-000, ordering PJM to:

- Report whether PJM will propose tariff changes that
 - Allow market participants to submit day-ahead offers that vary by hour and to update their offers in real time, including during emergency situations, and
 - Make any associated modifications to its market power mitigation rules
 - Including a timeline
- Or explain why such changes are not necessary
