RE: Notice of Deactivation of MRPC

Pursuant to Section 113.1 of the PJM Interconnection, L.L.C. ("PJM") Open Access Transmission Tariff ("Tariff"), Manchester Renewable Power Corporation ("MRPC") hereby submits notice of deactivation of the MRPC facility (Queue NQ127) as of April 1, 2025. MRPC consists of 6 landfill gas to electric generators rated at 0.8 MW each in Manchester Township, New Jersey. MRPC does not have any current capacity market obligations. Note that MRPC shares the point of interconnection with Ocean Energy Company (OEC) generators (Queue O20). The OEC generators are subject to a PJM Necessary Study, but are not being deactivated.

If there are any questions regarding this matter, please contact Caroline Taplinger, Director of Development, caroline.taplinger@nexteraenergy.com

Sincerely,
